Allen, B. J.—

See Hicks, G. C. 267

Amos, K. A.—

See Rikus, L. 9, 351

Amos, K., and Robbins, F.—

Surface effects on the energy gap in nuclear matter 17

Aoki, T.—

See Ohnuma, H. 371

Applied physics

Contribution of surface analysis and surface science to technology 769

Gallium arsenide as a competitor to silicon for high-speed amplification and switching 749

Nuclear magnetic resonance imaging 761

Physics of macromolecules 737

Role of electron microscopy in materials science 727

Surface topography measurement and analysis 777

Astronomy and astrophysics

Galactic radio emission below 16.5 MHz and the galactic emission measure 91

Loss-cone driven electron-cyclotron maser 447

Metre wavelength solar radio bursts with periodic modulation 87

New optical identifications from the Parkes 2700 MHz resurvey of the $\pm 4^\circ$ declination zone 207

Observations of the Jupiter S-bursts between 3.2 and 32 MHz 165

Parkes 2700 MHz survey: A resurvey of the $\pm 4^\circ$ declination zone 177

'Plasma emission' without Langmuir waves 67

Radio properties of a complete sample of bright galaxies 321

Atomic and molecular physics and spectroscopy

Electron coincidence spectroscopy: an introduction to momentum space chemistry 571

Electron-hydrogen elastic scattering at intermediate and high energies 393

Electron-photon coincidence studies in sodium 501

Electrostatic and relaxation effects in ionization of intermolecular complexes 651

Infrared absorption spectrum of water 623

Infrared laser spectroscopy of molecular beams 611

Intermediate-energy electron scattering by atomic hydrogen 543

Large momentum transfer excitation of He(3^1P) by electron impact at 81.2 eV incident energy 513

New class of atomic states: the 'Wannier-ridge' resonances 475

Orientation of He(2^1P) by electron impact excitation and polarization of the radiative decay 521

Pulsed electron beam time-of-flight method for measuring absolute total cross sections: atomic helium 559

Relativistic intermediate-coupling calculations for ions of the beryllium isoelectronic sequence 693

Removal of channelled spectra signatures in Fourier spectroscopy 709

Rotational and vibrational transitions in molecular collisions 593

Scattering cross sections in argon from electron transport parameters 35

Semi-empirical law for sputtering in plasma devices 699

Shape of the current-voltage curve for a flame ionization detector with two ionic components 715

Some theorems concerning group representations generated by determinantal wavefunctions 401

Stepwise electron-laser excitation studies of atoms 533

Theory and computational implementation of quadratically convergent Hartree-Fock orbital optimization methods and their relationship to time-dependent Hartree-Fock and RPA methods 639

Bacskay, George B.—

The theory and computational implementation of quadratically convergent Hartree-Fock orbital optimization methods and their relationship to the time-dependent Hartree-Fock and RPA methods 639

- Barker, F. C.—
 GDR contribution to Coulomb excitation.
 I. 1p shell nuclei 291
 GDR contribution to Coulomb excitation.
 II. ^{17}O 301
 GDR contribution to Coulomb excitation.
 III. ^{18}O 377
- Barnea, Z.—
 See Fakineos, A. 415
- Barut, A. O., and Bracken, A. J.—
 Exact solutions of the Heisenberg equations
 and Zitterbewegung of the electron in a
 constant uniform magnetic field 353
